## DEVELOPMENT OF ACV

1975-2006

To meet the demand of airport operation management in the region, airport groups were established in state-owned enterprise model, operated public services and changed their names into Northern, Middle and Southern Airports Region with head offices in Noi Bai International Airport, Da Nang International Airport and Tan Son Nhat International Airport.

From Feb 8<sup>th</sup>, 2012

Established Airports Corporation of Vietnam (ACV), directly under Ministry of Transportation, on the basis of merging three corporations namely Northern, Middle and Southern Airports Corporations.

2007

Established Northern, Middle and Southern Airports Corporation, directly under Ministry of Transportation.

From Dec 10<sup>th</sup>, 2015

ACV successfully organized IPO in Ho Chi Minh Stock Exchange (HOSE).

From April 11<sup>th</sup>, 2016

ACV officially operated in joint-stock company model, becoming Airports Corporation of Vietnam - JSC.

From Nov 21<sup>th</sup>

ACV's share was officially traded in UPCoM.

CHARTER CAPITAL  
21.772 BILLION VND

4.6%

From Nov 12<sup>th</sup>, 2018

Airports Corporation of Vietnam - JSC operated directly under Commission for the Management of State Capital at Enterprises.

Architectural design of Passenger Terminal - Phu Bai International Airport

# VISION & MISSION

- Continuing the leading role of the Government in the development in airports infrastructure.
- Environmental protection and response to climate change.

- Achieving business efficiency and service quality on par with the world.
- Preserving and developing capital to ensure resources for investment development

- Improving management skills to continuously invest, operate and manage the modern airports system.
- Applying advanced science and technology to improve competitiveness.

- Maintaining the stability of the employee's life and income.
- Ensuring aviation safety and security as the host of all sky gates to Vietnam

# TECHNOLOGICAL DEVELOPMENT

# DEPLOYING PLAN

ACV Common Use Terminal Equipment (ACV iCUTE) is an IT solution that is developed by our-self

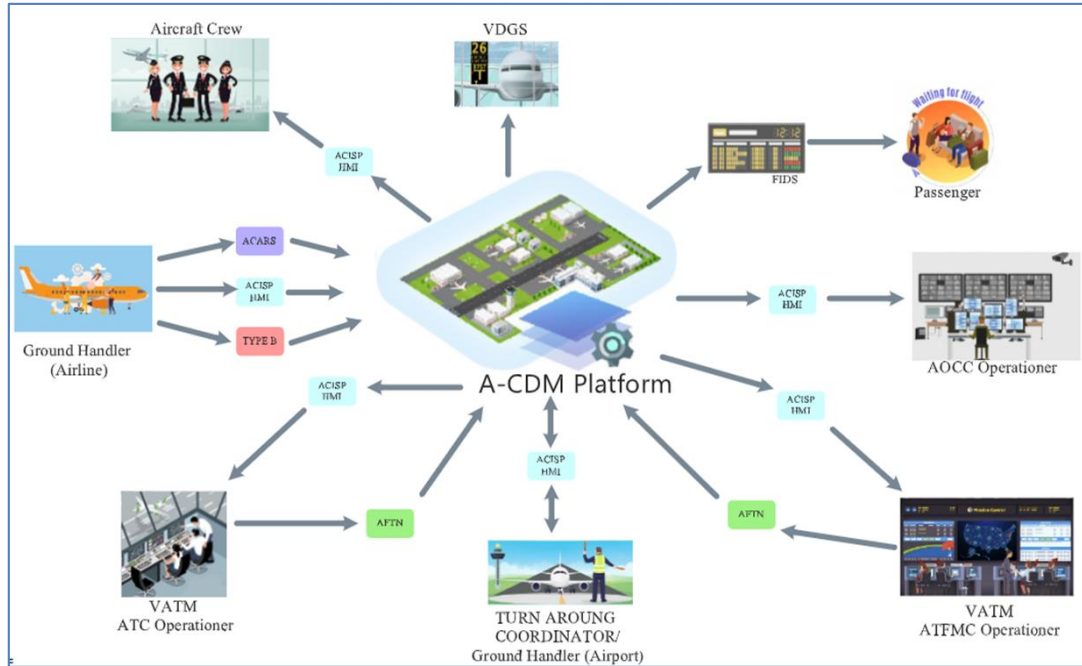

2022

ACV i-Cute enables multiple Domestic airlines to use existing airport infrastructures (the same hardware and equipment at a specific airport) to control passenger and flight processing through our own servers

# DEPLOYING PLAN

## Implement “Airport Collaborative Decision Making” (A-CDM) at Noi Bai and Tan Son Nhat International Airports

2022 - 2025

A-CDM can reduce airport and en route delay and optimize airport operations, by increasing an efficient turnaround process and improving flight predictability through real time data exchange for air navigation services

# DEPLOYING PLAN

## ACV Self - Service 2022 - 2023

### Self Kiosk Checkin

- Identify yourself with your ID or passport
- Confirm your flight information
- Review your seat assignment
- Indicate your checked bags
- Print your boarding passes

### Self-BagDrop

- SBD enables passengers to autonomously check-in and securely drop off their baggage
- Confirm your flight information
- The human-centric design increases passenger adoption, resulting in shorter lines, less waiting times – meaning happier passengers, smoother travel and smarter business
- Indicate your checked bags

### Self-BoardingGate

- Helps speed up the boarding process, cutting wait times at the gates
- Opening the door to secure and seamless passenger processing
- Single person detection system
- Ensures that passengers board the right aircraft.

# DEPLOYING PLAN

## Electronic Toll Collection (ETC)

**2024 - 2025**

Increases throughput, Reduce overall toll-collection costs, Reduce traffic congestion

## LONG THANH INTERNATIONAL AIRPORT PHASE 1

### Smart - Eco Airport

The entire Long Thanh Airport, upon completion after three phases, would have four runways and four passenger terminals. It is designed to handle a capacity of 100 million passengers and five million tons of cargo per year by 2040

The first phase is set to be up and running in 2025 to serve 25 million passengers per year

Smart Airport: AI, IoT, Big Data, Biometric Technology, Self services, Early Baggage System

In near future, ACV continues to upgrade our current airport to be more and more modern and intelligent, moving nearer to be “smart/connected” airport. There are some technologies that we plan to be equipped in our airports from now to 2025, orientation to 2030

# FUTURE ORIENTATION

## Contactless Technology within ACV Airport Environments

## Biometric Technology with ACV Self Services

- ✈ Facial recognition solution for passengers.
- ✈ Passengers use their faces as a means to access facilities around the airport:
  - Sel-Kiosk check-in
  - Self-Bagdrop
  - Self-Boarding gate

# FUTURE ORIENTATION

## SECURITY & OPERATION within ACV Airport Environments

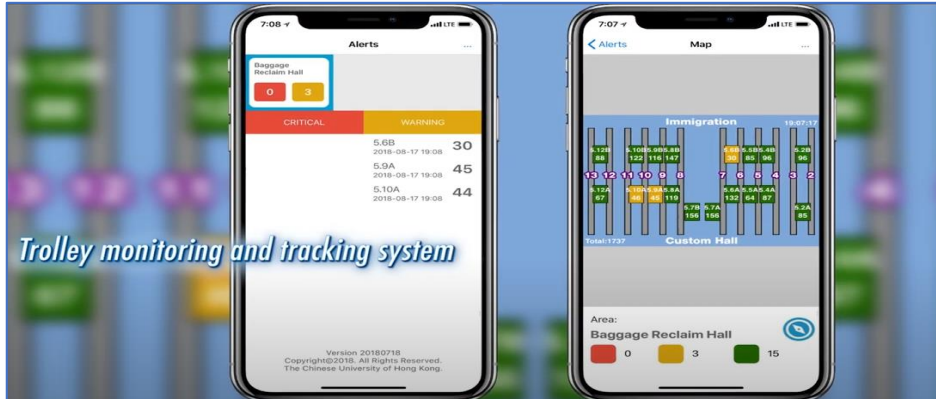

### Biometric Technology with Security

- ✈ Facial recognition security camera
- ✈ Protecting operations, site and people

# FUTURE ORIENTATION

## SECURITY & OPERATION within ACV Airport Environments

*Trolley monitoring and tracking system*

### Monitoring & Tracking System

- ✈ Trolley monitoring and tracking system
- ✈ GPS vehicle tracking

*GPS vehicle tracking*

# FUTURE ORIENTATION

## SECURITY & OPERATION within ACV Airport Environments

### Foreign Object Detection (FOD)

- ✈ Using FOD in runway
- ✈ FOD is set up on stand
- ✈ Mobile FOD is set up on cars

# DEVELOPMENT & INVESTMENT PLAN

# OBJECTIVES FOR THE PERIOD 2021- 2030

Ensure 22 airports to be modern, secure, safe, and efficient in accordance with ICAO standards

Joining logistic service provider system

Proficient implementation of digital transformation

Investment in human resources

Preservation and expansion of capital

## TOP 10 Fastest Growing Countries for Passengers 2017-2040

Over 50 million passengers per annum

Ranked

**01** | **6,2%**

Vietnam

Ranked 02

India

Ranked 03

Saudi Arabia

# STRATEGY FOR THE PERIOD 2021-2030

## CORE BUSINESS

Focus on development for core business and related service businesses (including market, service and product)

## CORPORATE GOVERNANCE

Consolidate the corporate governance

**ACV**

## CORPORATE ASSETS

Restructure the corporate assets & capital and people

## INFRASTRUCTURE INVESTMENT

Orientation of infrastructure investment with the objectives of environmental protection and technological advancement.

## MAIN INVESTMENT PROJECTS (PERIOD 2021-2030)

Scope in order	Airport	Categories
1	<b>Long Thanh International Airport Phase 1</b>	1 Terminal 25mil pax 1 Runway
2	<b>Tan Son Nhat International Airport</b>	New terminal T3 20mil pax
3	<b>Noi Bai International Airport</b>	T2 expansion to 15mil pax New terminal T3 10mil pax with auxiliary works
4	<b>Phu Bai International Airport</b>	New terminal 5mil pax
5	<b>Dien Bien Airport</b>	New airport
6	<b>Cat Bi International Airport</b>	New terminal T2 5mil pax Cargo terminal and parking stand area expansion
7	<b>Dong Hoi Airport</b>	New terminal 3mil pax
8	<b>Projects in reservation after master plan modification: Expansion plan of Da Nang, Cam Ranh and Phu Quoc International Airport</b>	

# LONG THANH INTERNATIONAL AIRPORT PROJECT

Since 2004, ACV has been assigned by the Government and Ministry of Transport to be the investor from the planning phase to prepare the Long Thanh International Airport Feasibility Study of Investment.

On 26/11/2019, at the 8th Session of the XIV National Assembly, the Feasibility Study Report for Long Thanh International Airport Construction Investment Project-Phase 01 was officially approved by the National Assembly of the Socialist Republic of Vietnam.

From 2020, ACV is ready to have all resources to implement the project Phase 1.

## Overview of Long Thanh International Airport Project

According to the Pre-Feasibility Study approved by the National Assembly in 2015, the total expected capacity of Long Thanh International Airport for all 3 periods is 100 million passengers/ year and 5 million tons of cargo/ year.

The project of Long Thanh International Airport consists of 3 phases:

### Phase 01 2020-2025

01

Constructing and completing runway No.01, T1 Passenger Terminal and auxiliary items to ensure the designed capacity of 25 million passengers/ year and 1.2 million tons of cargo/ year.

### Phase 02 2025-2030

02

Constructing and completing runway No.02, T2 Passenger Terminal and auxiliary items to ensure the designed capacity of 50 million passengers/ year and 1.5 million tons of cargo/ year.

### Phase 03 2035-2040

03

Constructing and completing runway No.03, runway No.04, T3 & T4 Passenger Terminal and auxiliary items to ensure the designed capacity of 100 million passengers/ year and 5 million tons of cargo/ year.

# LONG THANH INTERNATIONAL AIRPORT PROJECT

Groundbreaking Ceremony of Long Thanh International Airport

## MILESTONES PHASE 1

2015 - 2019  
Completion of feasibility study report Phase 1

2020 - 2023  
Preparation of construction investment procedures, project implementation

2023 - 2026  
Commencement of construction and completion of Phase 1

From 2026  
Put Long Thanh International Airport into operation

# LONG THANH INTERNATIONAL AIRPORT PROJECT

## Investment Phase 01

Runway

Passenger Terminal

373,000 m<sup>2</sup>

## Auxiliary items

Apron with 64 positions

Air traffic control tower - 123 m

Parking lot of 3,500 parking positions

Catering area with 40,000 meals/day

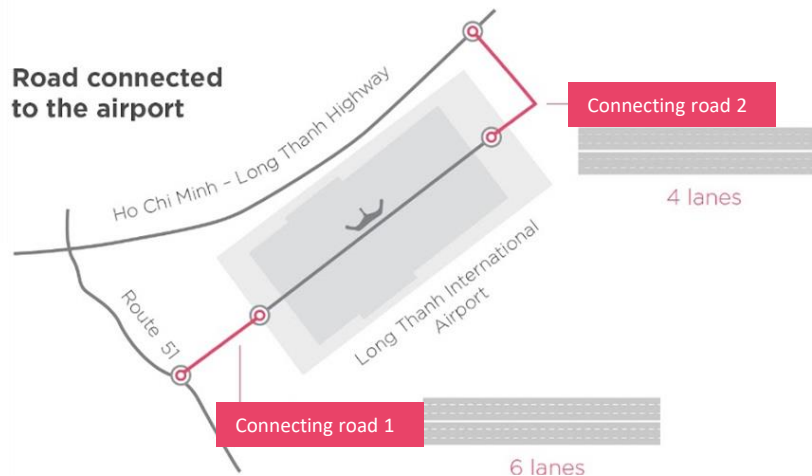

Aircraft maintenance facilities

Fuel station and waste disposal

## Road connected to the airport
